

Daily Literacy and Maths Activities - wb - 11th May

Literacy

This week we will continue our project with Mavis the Cat—look out for the extra pages to help you with the activities.

Look at the Day 1 page photos. Where did Mavis go on her adventure?

Choose one of your favourite toys and take them on an adventure around your house and outside space.

Ask a grown up to take photos at each place they visit or draw the pictures yourself.

Sequence a story.

Read the story sequence with a grown up. Look at the pictures and work out the missing words. Use your sounds to help you write the places Mavis visited during her adventure. Now use your finished story map to help you retell the story of Mavis's adventure.

Make your own story map!

Use your photographs or drawings of your toy's adventure to help you create your own story map. Stick them on to a story path like the one on the Day 3 page and label where each picture happened.

Telling a story!

Use the story map that you created yesterday to help you to tell the story of your toy's adventure.

Try to write the opening sentences of your story, using your sounds to help you.

How much of your story can you write in your work book?

Handwriting practice!

Complete 2 pages in your letter formation booklet.

Think carefully where the letter starts and which way it goes!

Always start from the dot!

Maths

This week we are going to look at measuring the weight of objects.

Become a human balance scale.

Choose two objects and place one in each hand. Tip to the side to show which is the heaviest of the two objects. Measure 6 different things this way and put them in order lightest to the heaviest comparing each. Draw and label your objects in order.

Find an object such as an apple or a book.

Now search for things around the house or outside that are either lighter or heavier than the object.

If you have scales at home you can ask an adult to help you check to see if you were right!

Look at all the day 3 small pictures and see which ones you think are light and which are heavy.

If you are able to, print out the pictures, cut them out and stick them on the correct pages. If you are unable to print the pictures, label pages and draw your own pictures of each thing on the correct

Share the cake recipe on the day 4 pages with a grown up and talk through the things you would need. Which do you need the most of?

See if you can help weigh out the ingredients needed and make a cake.

Or look at one of the other recipes and try that instead.

Take a photo of what you make and stick in it your book with a label to share!

Complete 2 pages in your number formation booklet.

Think carefully where the number starts and which way it goes! Always start from the dot!
