

Science Home Learning Grid Spring A

This half term our science focus is “Materials.” Please choose at least one of the activities from the grid below. You could take a photograph and your child can bring it into school to show the class when they return.

Find out what household items can and can't be put into the recycling bins.

Then create a poster to help others to know which items they can put into the blue recycling bins at home.

Collect 6 different items made of different materials from around the house (eg tissue, a plastic bag, cardboard, fabric, paper, tin foil.)

Test to see if each item is waterproof or not.
Can you explain which materials are waterproof?

can you find some instructions online to make a paper boat? Test it to see if you can get it to float.

Try making a boat out of other materials you have in the house and test them.

Make an item of clothing for a teddy. It must be water proof to keep them dry on a rainy day.
