

French

Learning a language is an important part of our pupils' understanding of the world (the DNA thread of *your world*) and prepares them for life beyond primary school. We make French lessons fun and active.

Our French topics are taken from Lightbulb Languages and do not follow a two-year cycle due to the nature of language learning. Whilst topics may be taught in two consecutive years, the activities will be changed, allowing children in the older year group to revise prior knowledge and to then reach a greater mastery of the language.
